PROFESSIONAL SUMMARY

Full-Stack developer with a strong foundation in computer science and hands-on experience designing and developing web applications across frontend and backend technologies. Proficient in PHP, Laravel, JavaScript, React, Next.js, NestJS, and MySQL, with practical experience building responsive user interfaces, RESTful APIs, and database-driven applications. Demonstrates a solid understanding of Clean Architecture, Domain-Driven Design (DDD), and software design principles through academic and personal projects. Motivated about developing scalable, maintainable, and user-focused solutions while continuously expanding technical expertise and growing as a software engineer.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS, JavaScript, TypeScript, React (where configured), Next.js, Tailwind CSS
- **Backend & Services:** Appwrite, API integration concepts, authentication and session workflows
- **Tools & Platforms:** Vite, Node.js, npm, Git, GitHub
- **Libraries & UI:** React Hook Form, Zod, Chart.js, ShadCN UI
- **Integrations & Monitoring:** Plaid, Dwolla, Sentry (as documented in the banking project)
- **Development Practices:** Responsive design, reusable components, form validation, debugging, production builds

EXPERIENCES

FULL-STACK DEVELOPER — MAY 2026 - PRESENT

ITVisionHub Co., Ltd / Yangon, Myanmar

- Develop responsive and user-friendly web applications using PHP, Laravel, JavaScript, React, HTML5, CSS3, and Tailwind CSS.
- Build and maintain full-stack application features, integrating frontend interfaces with backend functionality and MySQL databases.
- Implement database-driven functionalities and backend logic to support efficient data processing and reliable application workflows.
- Apply clean coding practices and software development principles to create maintainable, reusable, and well-structured code.
- Utilize Git and GitHub for version control, Postman for API testing, and Vite for modern frontend development workflows.
- Collaborate on software development tasks while continuously improving technical proficiency, problem-solving abilities, and application development skills.

KEY PROJECTS

Grape Cultivation Advisory Chat System | *Full-Stack Developer*

GitHub: https://github.com/htet-nandar-linn/GrapeCultivationAdvisoryChatSystem-AI-Chat-System
Tech Stack: PHP, MySQL/MariaDB, JavaScript, Tailwind CSS, Ratchet WebSocket, Ollama, Composer

- Designed and developed a web-based grape cultivation advisory platform to connect farmers with agricultural experts and provide cultivation guidance.
- Implemented Role-Based Access Control (RBAC) with separate Admin, Expert, and Farmer functionalities.
- Developed a consultation management workflow that allows farmers to submit questions, administrators to assign experts, and experts to respond through chat.
- Integrated an AI-powered chatbot with an approved agricultural knowledge base to provide relevant grape cultivation advice.
- Applied a layered, Domain-Driven Design (DDD)-inspired architecture to organize application logic and improve maintainability.
- Implemented real-time messaging using WebSocket technology to support farmer–expert communication.

Banking Management Application (Horizon) | *Full-Stack Developer*

GitHub: https://github.com/htet-nandar-linn/banking
Tech Stack: Next.js 14, React 18, TypeScript, Tailwind CSS, Appwrite, Plaid, Dwolla, React Hook Form, Zod, Chart.js, Sentry

- Developed a modern financial management platform that allows users to connect and manage multiple bank accounts.
- Implemented user authentication, account overview, transaction history, and financial dashboard interfaces.
- Integrated Plaid for bank connectivity and financial data integration.
- Incorporated Dwolla integration to support money transfer workflows.
- Built responsive user interfaces using React, TypeScript, Tailwind CSS, and reusable UI components.
- Integrated form validation using React Hook Form and Zod, with Sentry for application error monitoring.

Campus Food Ordering System | *Full-Stack Developer*

GitHub: https://github.com/htet-nandar-linn/Campus-Food-Ordering-System
Tech Stack: PHP, MySQL, HTML5, CSS3, JavaScript, Composer, PHPMailer, Dompdf, Google API Client

- Developed a web-based food ordering system to support campus food and canteen operations.
- Implemented food management and shopping cart functionality to organize food selections and ordering workflows.
- Developed authentication and user access control components to manage application permissions.
- Integrated MySQL for relational data storage and PHP for server-side application logic.
- Incorporated PHPMailer for email functionality and Dompdf for PDF generation.
- Organized application code using separate application, routing, and view components.

Media Library Management System | *Full-Stack Developer*

GitHub: https://github.com/htet-nandar-linn/Media-Library
Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, MVC Architecture, Composer

- Developed a web-based media library application using PHP and MySQL.
- Applied the Model–View–Controller (MVC) architectural pattern to separate application logic from presentation.

- Integrated MySQL database functionality to manage application data.
- Organized application modules, view templates, public resources, and database scripts for maintainable development.
- Used Composer to manage PHP dependencies and environment configuration.

Personal Portfolio Website | *Front-End Developer*

Live Portfolio: https://htet-nandar-linn.github.io/my-portfolio/
GitHub: https://github.com/htet-nandar-linn/my-portfolio
Tech Stack: React, JavaScript, Vite, HTML5, CSS3, Tailwind CSS, Git, GitHub

- Designed and developed a responsive personal portfolio website to showcase professional background, technical skills, education, and development projects.
- Built reusable React components to create structured and maintainable website sections.
- Implemented responsive layouts and modern styling using Tailwind CSS.
- Configured Vite for development and production build workflows.
- Managed source code and version control using Git and GitHub.

Vite Web Application | *Front-End Developer*

GitHub: https://github.com/htet-nandar-linn/Vite-Project
Tech Stack: React, Vite, JavaScript

- Intended project description: A modern web application developed using React and Vite.
- Add implementation details and project features after the source code and README are available in the repository.

EDUCATION

Bachelor of Computer Science (B.C. Sc)

University of Computer Studies, Meiktila, Myanmar (Graduated 2026)

LANGUAGES

- **Burmese:** Native
- **English:** Working Knowledge

ADDITIONAL INFORMATION

- Notice Period: 2 weeks
- Current Location: Yangon, Myanmar
